

MUTHUKKUMARAN B

Software Developer | Backend Developer | Web App Developer

mailtomuthukkumaranb@gmail.com | India | LinkedIn: linkedin.com/in/muthukkumaran-b | Github: <https://github.com/muthukkumaranb>

PROFESSIONAL SUMMARY

First-year Information Technology student with hands-on experience in Java, Python, C++, Data Structures and Algorithms, and proven training experience as a Technical Trainer Intern. Proficient in web app development with strong problem-solving skills (50+ problems solved on LeetCode and HackerRank). Seeking a Software Developer or Frontend Developer role to apply algorithmic knowledge and contribute to scalable software engineering projects.

TECHNICAL SKILLS

Programming Languages: Java, C++, C, Python, Django

Concepts: Object-Oriented Programming (OOP), Time & Space Complexity Analysis, CRUD Operations, REST APIs, Unit Testing

Tools & Platforms: Git, GitHub, VS Code, g++

EXPERIENCE

Technical Trainer Intern — CSC Computer Education, Erode

Apr 2026 – May 2026

- Trained students in Python, C, and C++ programming languages through structured technical sessions and hands-on practical learning activities.
- Assisted participants in understanding core programming concepts, strengthening their problem-solving and coding fundamentals.
- Demonstrated strong communication, technical proficiency, and leadership skills, earning commendable performance recognition from the organization.

PROJECTS

Mini ERP System

June 2026

Django | HTMX | Alpine.js | Tailwind CSS | SQLite | Ollama(LLM)

- Built a full-stack, modular ERP web application covering 14 business domains including sales, purchase, inventory, manufacturing, procurement, delivery, foreign trade and blockchain based supply chain tracking.
- Managed the complete development lifecycle using Git and Github, including version control, branching strategies, and collaborative commits.
- Designed a reactive, AJAX-driven using HTMX and Alpin.js with Django as backend, avoiding heavy JS frameworks while keeping the interface dynamic.
- Integrated a local LLM (via Ollama) to power a voice assistant feature and implemented audit logging, real-time dashboards And Celery-based background task processing.

Platter to Purpose

Feb 2026

HTML5 | CSS3 | JavaScript | Python | Django | Git | GitHub

- Developed a full-stack community web platform that connects users with social resources, support services, and volunteer opportunities through an intuitive web interface.
- Built the backend using Python and Django, implementing user authentication, database models, dynamic routing, and CRUD operations to manage community resources efficiently.
- Designed a responsive, mobile-first front end using HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and adherence to accessibility best practices.
- Managed the complete development lifecycle using Git and GitHub, utilizing feature branching, version control, and collaborative workflows to maintain code quality and streamline development.

Personal Portfolio Website

Mar 2026

HTML5 | CSS3 | JavaScript | Canvas API | Responsive Web Design

- Built a responsive single-page portfolio with hero, about, skills, projects, and contact sections and smooth scrolling navigation.
- Implemented interactive Canvas API effects (animated particle background, mouse interaction) using a mobile-first HTML5/CSS3 layout.

EDUCATION

Bachelor of Technology – Information Technology

2025 – 2029

Sri Krishna College of Engineering and Technology, India | SGPA: 9.05 / 10.0

Relevant Coursework: Data Structures and Algorithms, OOP with C++, Discrete Mathematics, Computer Organization and Architecture, Operating System

ACHIEVEMENTS & CERTIFICATIONS

- Solved 50+ Data Structures and Algorithms problems on LeetCode and HackerRank (arrays, linked lists, trees, graphs, DP, sorting).
- Maintained a 30-day consecutive problem-solving streak on LeetCode, logging solutions with complexity annotations on GitHub.
- Advanced Diploma in Java Programming — Computer Software College, 2025.
